Education

Bachelors in Statistics and Data Science

UCLA, Los Angeles, California

September 2022 to June 2026

GPA: 3.97/4.00

Awards

Don Ylvisaker Best Insight, UCLA Datafest 2025

- Awarded to 1 of 70+ teams for outstanding analytical insight; analyzed Los Angeles submarket data to advise clients on optimal office locations based on industry, budget, building type, and CBD proximity

Projects

Bridging the Privacy Gap: HIPAA Compliance for AI Mental Health Chatbot

Fall 2025

- Co-authored a policy brief for DataX's 2025 Hackathon recommending HIPAA integration and marketing restrictions for mental health chatbots to enhance data security and accountability

"How Lifestyle and Physiological Factors Can Predict Type II Diabetes"

Fall 2024

- Presented analysis using Random Forest and logistic regression to model risk factors for Type II Diabetes; conducted data preprocessing, model building, and result interpretation

Twitch Chat Sentiment Analysis

Summer 2024

- Created a program to measure viewer engagement metrics (e.g., message frequency, message content, sentiment, user count) from Twitch streams
- Processed chat data for analysis, implemented natural language processing techniques using R

Professional Experience

Intern – Beta Hat Market Research

November 2025 to present

- Assisted with collection and analysis of quantitative and qualitative data through online surveys and focus groups
- Performed backend tasks (e.g., bad-case searches, link testing, survey creation) and client-facing tasks (e.g., report creation, graph population)

Game Capture Artist – Team Liquid

May 2025 to present

Collaborative project with Riot Games

- Captured high-quality gameplay footage for trailers and advertisements, utilized OBS to record and edit gameplay data
- Coordinated with cross-company production teams to manage deadlines, changes, and requests

E-commerce Supervisor – UCLA Computer Store

October 2023 to November 2025

- Managed back-end operations for the largest on-campus computer store, including processing, fulfilling, and delivering departmental orders
- Wrote and implemented an employee handbook, encouraging easier integration of new employees and boosting efficiency

Skills

Languages and Tools: Python, R, SQL, Tableau
